About the Workshop:

The National Education Policy (NEP) 2020 aims to transform education, keeping the learner at the centre. The NEP 2020 is a huge stride in the right direction it focusses on the holistic development of students by ensuring access, relevance, equity, quality and strong foundational learning. Also, there is a new way of envisioning vocational education in the policy by integrating it across secondary and higher education and developing a credit framework to offer vertical and horizontal mobility between vocational and higher education. One of the stronger themes across the entire policy document is around quality improvement in the learning outcomes. A diverse policy that aims to meet the future learning needs which will engrain practical skill-based learning to shape the learners being Industry ready. The policy very well addresses most of the critical issues that daunt our current education landscape and brings about a totality in terms of the paradigm shift that we need for educated and skilled people in India. The NEP will offer multiple exit points in studies, which means that one could actually get into employment at different ages, different times, and different levels of education which is a thoughtful strategic structure.

Key highlights of NEP 2020: Higher Education:

- The policy will integrate vocational and academic courses, resulting in producing Industry ready professionals
- Integration of vocational education within higher education. At least 50 per cent learners to have exposure to vocational education by 2025.
- Enhanced equity and inclusion - Establishing high-quality HEIs in aspirational districts and Special Education Zones. At least one large multidisciplinary HEI in or near every district by 2030.
- Conversion of existing standalone professional institutions to multidisciplinary HEIs by 2030. All HEIs to be multidisciplinary with student strength > 3000.
- Three-tiered institutional architecture. Tier i – Research Universities, Tier ii – Teaching Universities, Tier iii – Autonomous colleges. All colleges to be accredited and become autonomous degree granting colleges by 2035.
- Flexible curricular structure that will offer multiple entry and exit points to create new possibilities for lifelong learning.
